Sketches

1. This is a common app for every person's life. Calendar and reminder, help you with time management, convenient for schedule creation and reminders, quickly view your schedule.
Remind your meeting, birthday, to-do. You also can use it like a note book.
2. App title: My calendar and reminder
3. App description:
 - a. Calendar view: support fast switching between multiple views, easy to operate.
 - b. Remind your meeting, birthday, to-do.
 - c. Maybe can show festivals in the future.
- 4.

Sounds like this is just the built in calendar. Is there additional features that your app has that the built in calendar doesn't have? Make sure you add some interesting features and iOS specific technologies to get a great grade on the final project.

Grade: 80
